## ST. LUKE'S HOSPITAL

On the eighteenth of February, 1864, under the leadership of Dr. Clinton Locke, Rector of Grace Church, occurred the founding of St. Luke's Hospital and later that year the Hospital became incorporated. The history of the growth of the Hospital from that time to the present well represents the interest and efforts made by the Boards of Trustees and friends of the Hospital.

A small frame house on State Street near Eldridge Court accommodating seven patients was the nucleus, later that year a nearby brick house was rented and facilities were provided for eighteen patients. In 1871 the Hospital moved to Indiana Avenue and occupied a part of the present site. A few years later steps were taken to erect a well designed hospital and by 1891 the capacity became one hundred and fifty-two beds. An urgent need for a private patient pavillion developed and in 1908 the "George Smith Memorial" was erected on Michigan Avenue with accommodations for one hundred and ten patients.

A nineteen-story building on Indiana Avenue was completed in 1925 and provides for five hundred and forty patients. A portion of the older building still stands on Indiana Avenue but the new building occupies the greater frontage. In this building the entire second floor is allotted to education and social activities of the School of Nursing and consists of classrooms, laboratory, assembly room and a very attractively furnished reception room. The three floors above are used as living quarters for the student nurses and are so arranged to insure privacy. "Stickney House," the present residence for nurses, was erected in 1898 and provides comfortable surroundings for the students.

St. Luke's Hospital is one of the large general hospitals of Chicago which renders to the public the double service of a private institution where most efficient and luxurious hospital, medical and nursing attention may be enjoyed and at the same time expert care given free of charge to those unable to pay.

In 1929, twenty percent of the work done by the Hospital was done without charge and the cost of rendering free service was approximately two hundred thousand dollars. In the Social Service and Out-Patient Departments of the Hospital, approximately thirty-eight thousand patients were treated.

The bed capacity of the Hospital including the private pavilion is about six hundred and fifty beds.

St. Luke's is literally at the gateway to Chicago's Loop district. Hence being the nearest large hospital it is looked to as an emergency center for the multiplicity of emergency and accident cases that daily arise where there is a high concentration of population.

The growing development of Chicago's lake front adds another responsibility to St. Luke's Hospital. Grant Park and the lake front district with new facilities of public interest are attracting greater crowds year by year.

In 1933 the lake front will be the site of the Century of Progress Exposition and will bring to Chicago millions of visitors from all over the world. St. Luke's with its proximity to the exposition grounds will be called upon to render emergency service to Chicago's visitors during this great exposition.

## **THE NEW RESIDENCE AND SCHOOL OF NURSING**

The Board of Trustees of St. Luke's Hospital have announced plans for the construction of a new residence and school for housing and educating student nurses. This building will be located on Indiana Avenue just south of Grace Church which adjoins the Main Building and will be sixteen stories high. Georgian architecture with a modern motif will make the residence in keeping with other types of development contemplated for the lake front.

Considerable thought has been given to include attractive reception rooms, assembly rooms, assembly hall, library and swimming pool to afford proper facilities for recreation and relaxation. Classrooms, laboratories, a demonstration room, study room and reference library with modern and complete equipment has been planned for the section of the building set aside for the school. Accommodations will be provided for over four hundred nurses. A lounge and kitchenette will be located on each floor.

The construction of this building will release four floors of the Main Building which will allow for expansion of several departments which are badly overcrowded at present. A campaign to raise funds for the construction of this building is now under way.

## **SCHOOL OF NURSING**

### **ORGANIZATION**

The School of Nursing of St. Luke's Hospital, organized in 1885, is an integral part of the Hospital and governed by the same Board of Trustees. Six nurses graduated in the first class and with that beginning the enrollment gradually increased until at the present time there are approximately sixty students graduating each year. Over twelve hundred nurses have received diplomas from this School, many of whom have filled or are now occupying responsible positions in all parts of the country.

The founders of the School felt that a high grade of nursing service could be secured for the patients of St. Luke's Hospital by organizing a school where young women seriously interested in humanitarian service could be trained not only for hospital work but for nursing in the community as well. Thus the purpose has been to provide thorough instruction and experience in the care of the sick and also instruction in the principles of health and hygiene to better serve the community in the varied field of Public Health Nursing.

### **EDUCATIONAL FACILITIES**

St. Luke's Hospital offers unusual opportunities for instruction and experience in nursing. It is one of the largest general hospitals for the reception and treatment of acute diseases in Chicago. Practically every type of patient enters the hospital and the student has the privilege of studying and nursing these patients when she is having her hospital assignments in the medical, surgical, obstetrical and children's departments of the hospital. Opportunity for instruction and experience is also given in the eye, ear, nose and throat department, operating rooms, diet kitchen, out-patient and social service department and in the private pavilion of the hospital. The hospital is so designed and equipped to afford the most modern scientific, medical and nursing service to the patients.

To supplement the experience given at St. Luke's Hospital, affiliations in some of the special fields of nursing have been provided. Through the Visiting Nurse Association, arrangements have been made for students to care for the sick patient in the home. These students under close supervision gain an insight into the social and economic problems of the family as well as the health problems.

The Illinois School of Psychiatric Nursing gives to students who elect that experience, opportunity to care for the mentally ill. The instruction and supervision given are invaluable to her in every phase of general nursing.

A library containing reference books, charts, pamphlets and nursing journals has been established in connection with class rooms on the second floor of the Main Building. A very complete Medical Library is located on the eighteenth floor of the Main Building and frequently used for reference reading by the faculty and students of the School of Nursing.

The faculty of the School of Nursing consists of administrators, instructors, supervisors and head nurses who are well qualified in the responsibilities they have assumed. Dietitians and Social Service workers direct the nurses in those departments. The Medical Staff of St. Luke's Hospital assists in giving lectures in the clinical subjects.

## ADMISSION REQUIREMENTS

Candidates desiring to enter the School of Nursing may secure complete information and application blanks by writing to the Director, School of Nursing, St. Luke's Hospital, Chicago. If possible, a personal interview should be arranged after all the credentials have been submitted. Prospective students should be accompanied by parents or a near relative when coming for an interview. They will be shown through the Hospital and given full information regarding the opportunities offered. Prompt acknowledgment of applications is made but acceptance for enrollment cannot be made until the credentials have been carefully reviewed. Classes are admitted in the early part of September and February.

**EDUCATION.** Applicants must present credentials of graduation from an accredited high school or its equivalent. Preference will be shown to young women having had advanced educational preparation and cultural opportunities.

Credit either in time or courses, or both, is given to students who present evidence of advanced education or professional preparation. The amount of credit will be determined after the student has demonstrated her general fitness for the nursing profession.

**HEALTH.** In order to maintain high standards of health, it is necessary that each applicant present a report of a careful physical examination made by her family physician. His recommendations regarding tonsils and any

other remedial defects must be adopted before the applicant can be accepted.

Certification showing vaccination for smallpox and inoculation for typhoid within one year of entrance is required by the School. This report must be forwarded at least one month before date of enrollment.

A statement from the family dentist is also required to complete the health reports.

**PERSONAL QUALIFICATIONS.** Preference is given to applicants between 19 and 35 years of age whose personal qualifications seem to show proof of good character and seriousness of purpose. The School considers it inadvisable to admit or retain married women.

## **EXPENSES**

No charges are made for tuition. Students receive board, room and laundry from date of entrance, but are required to purchase their own text books. The cost of books for the three years will amount to about thirty-five dollars. At the time of entrance over half of this amount will be needed to purchase books used during the first semester.

During the preliminary term, students provide their own uniforms and aprons, after which the school uniform is supplied by the Hospital. During the three years in the School, the student is expected to meet her own personal expenses which depend on her own tastes and needs. With careful planning most students can get along very well if assured of an allowance of ten dollars per month. Students who have been enrolled in the School at least a year and are in need of financial assistance may be granted small loans from a fund established for this purpose. The money may be borrowed without interest with the understanding that it will be returned to the fund as soon as possible after graduation.

## **STUDENT HEALTH PROGRAM**

The health program is conducted under the supervision of a Welfare Director who endeavors to teach the students principles of personal hygiene and their practical application in the promotion of health. During the first semester each student is given a careful physical examination which includes a complete history of all previous illnesses and operations.

Students are urged to report promptly any indisposition to avoid absence from classes or duties. When ill, they are given care in the Infirmary which is under the direction of graduate nurses and are attended by members of the Medical Staff of St. Luke's Hospital.

Health examinations are given each year and recommendations for the welfare of each student are carefully followed.

Time lost because of illness or necessary absence must be made up.

### **VACATION AND ABSENCE**

Students are allowed four weeks' vacation each year or twelve weeks during the three years. Vacations are usually planned during the months of June, July, August and September of each year. Students are not permitted an extension of vacation time and will be considered on leave of absence if they do not return on scheduled time. They will then be reinstated at the convenience of the School.

### **RELIGIOUS INFLUENCE**

While St. Luke's Hospital was founded under the direction of leaders in the Episcopal Church, the question of creed never enters into its work, either as to patients or the selection of students in the school. Grace Episcopal Church is closely affiliated with St. Luke's Hospital and has recently completed a beautiful new church on Indiana Avenue, adjoining the Hospital. Daily chapel services are conducted for the nurses by the Chaplain. Students are encouraged to attend church services of their preference at least once on Sunday.

### **SCHEDULES OF HOURS ON DUTY**

During the Preliminary Term the students are on duty in the general wards two hours daily. For the remainder of the course the students are on duty in the wards and various departments of the Hospital for fifty-two hours to fifty-six hours per week. Each student is given a half day off duty during the week and on Sunday.

### **STUDENT ACTIVITIES**

The social activities of the School are largely under the direction of the Social Welfare Director. Each class has its own organization and throughout the year many special parties and teas are enjoyed. The Young Women's Chris-

*Kindergarten*

tion Association of St. Luke's Hospital has a large and active membership and sponsors lectures, picnics and athletic activities. It is an Inter-Collegiate branch of the Young Women's Christian Association of Chicago.

Additional recreational activities are now established by organizing the following clubs: Bridge Club, Athletic Club, Dramatic Club, Arts and Crafts Club, Literary Club, Glee Club and Orchestra. Membership is voluntary, however, each student is strongly urged to become actively interested in at least one or two clubs. There is a small activity fee which is supplemented in order that a trained leader may be secured to direct.

The Herman H. Hettler, Jr., Fund was established in 1930 to be used for the comfort and pleasure of the nurses. The income from this bequest of ten thousand dollars will materially aid in working out a worthwhile extra-curricular program.

Through the Nursing School Committee of the Woman's Board, as well as through individual members, the social and home life of the student nurses has been made attractive and comfortable.

## **SCHOLARSHIPS**

The Charles Schweppe Scholarship Fund established in 1930, provides for three annual scholarships each of the value of one hundred dollars to be awarded to students who have shown exceptional ability in the class room, in ward practice and in student relationships. One scholarship is awarded to a member of the senior class, one to a member of the junior class and one to a member of the freshman class.

In order to encourage advanced study in Administration, Supervision or Teaching, the Woman's Board of St. Luke's Hospital annually award two scholarships to graduates of the School of Nursing. One scholarship of the value of two hundred and fifty dollars is awarded for post graduate study at the University of Chicago. One scholarship of the value of twelve hundred dollars has been established to be awarded to a graduate who desires to secure post-graduate work at Teachers' College, Columbia University, New York. The above scholarships are given to graduates whose work has been of exceptional merit.

## **GRADUATION**

The diploma and pin of the school are granted to students who have successfully completed the required course

in nursing. Commencement exercises are held at the close of the school year. The hospital and school continue to be interested in the nurse after graduation and endeavor to give her assistance in securing desirable positions in the phase of nursing she is best qualified to enter.

## **REGISTRATION**

In order to practice as a Registered Nurse, graduates are required to pass the examination given by the Department of Registration and Education of the State of Illinois. This entitles the nurse to registration by reciprocity or examination in other states.

## **ALUMNAE ASSOCIATION**

All graduates of the School who are in good standing and are registered nurses are eligible to membership in the St. Luke's Hospital Alumnae Association. This Association was organized in 1897 and is most helpful in maintaining high professional standards among the graduates of the School. Membership in the Alumnae Association admits the graduate to the district, state and national nursing organizations. She is also eligible for membership in the American Red Cross Nursing Service and the Army and Navy Nurse Corps.

## CURRICULUM

The course of instruction in theory and practice of nursing covers a period of three calendar years.

**FIRST YEAR.** First Semester. The aim during the preliminary period or the first five months is to develop in the student a sound knowledge of the elementary nursing procedures. Theoretical courses covering the sciences necessary to a proper understanding of the elementary nursing are also given during this period. The students spend about six hours in the class rooms and laboratories of the school and two hours daily in ward practice under constant supervision. At the close of the first semester, if the students satisfactorily pass both written and practical tests and demonstrate a general fitness for nursing, they are accepted as regular students in the school and are given the regulation uniform.

Second Semester of first year. During the second semester the student is assigned regular duties in the Hospital in the general medical and surgical services. Lectures, demonstrations and clinical studies are continued, correlating as far as possible with nursing practice.

**SECOND YEAR.** In the second year the student is prepared for greater responsibilities by instruction, both practical and theoretical, in advanced nursing. Experience in the dietary department, children's services, orthopedic department and operating rooms is included during the second year.

**THIRD YEAR.** Lectures and demonstrations on the most advanced nursing subjects are given during the third year. This also includes special lectures on important topics related to nursing. Experience in special services including eye, ear, nose and throat, obstetrics, out-patient department and social service, is given during the third year.

In the last half of the third year, students who have shown special ability in executive work or teaching are permitted to elect additional experience for a period of two or three months in the departments in which they are most interested. To a limited number of senior students wishing to prepare for Public Health Nursing, two months' experience is available with the Visiting Nurse Association. Other students particularly interested in securing experience in caring for the mentally ill may spend four months in the Illinois School of Psychiatric Nursing.

# SUBJECTS OF INSTRUCTION

## FIRST YEAR

### FIRST SEMESTER

#### **Elementary Principles and Practice of Nursing: 120 Hrs.**

Lectures, demonstration and class room practice of the procedures used in the care of the sick. This also includes the fundamental principles of bandaging and the application of the commonly used methods of bandaging. The class room practice is closely correlated with practice on the wards under supervision.

Miss Crawford, Miss Nicolai, Miss Frost.

#### **History and Ethics of Nursing: 30 Hours**

This course is designed to acquaint the students with the leaders of the Nursing Profession, their ideals, and the many obstacles overcome by them; to explain the meaning of hospital regulations and the ideals of the behavior from which these have grown; to assist the student in forming her philosophy of life to the end that she may live happily and usefully.

Mrs. Crocker, Miss Derhammer.

#### **Personal Hygiene: 15 Hours**

This course emphasizes the importance and application of good health habits, also the opportunities and the obligations of a nurse as a teacher of personal hygiene.

Miss Shannon.

#### **Anatomy and Physiology: 90 Hours**

A fundamental study of the structures and functions of the normal human body with special reference to the problems of hygiene and nursing.

Miss Derhammer.

#### **Microbiology: 45 Hours**

An elementary course dealing with the study of microorganisms as they affect the human body. Special emphasis is placed on pathogenic varieties and methods of control.

Miss Groppe.

*Nurses' Station, Main Building*

**Chemistry:** **45 Hours**

The purpose of this course is to present those general principles of chemistry, inorganic, organic and physiological, which give the necessary foundation for practical courses such as nutrition, dietetics, materia medica, bacteriology and physiology.

Miss Groppe.

**Psychology:** **30 Hours**

The object of this course is to give the student an introduction to psychology, and to apply the laws and principles of psychology to an economical method of study and to nursing problems.

Miss Derhammer.

**Drugs and Solutions:** **15 Hours**

A course designed to familiarize the student with the systems used in weighing and measuring drugs; the preparation of solutions; and the common drugs used as antiseptics and disinfectants. Laboratory practice is given in the preparation of the various dosages and solutions.

Miss Nicolai.

SECOND SEMESTER

**Materia Medica:** **30 Hours**

A continuation of the study of drugs, their source, their action upon the body, the form in which they are administered and their dosages; the particular diseases for which they are valuable, and the effect and treatment of an overdose.

Miss Nicolai.
